

Healthcare Boiler Hire Hospital, London 100kW Boiler Hire

The challenge

London's Kings' College Hospital required a temporary heating solution during planned maintenance work on its boiler, in a project lasting eight weeks..

What did we do?

Carrier Rental Systems provided a temporary hire boiler to enable the hospital to continue operating, while the contractor carried out the refurbishment work on the existing boiler over a two-month period.

How did we do it?

Greg Joyce, CRS regional sales manager for London, carried out a full site survey, and advised the customer on what size boiler would be required, how the hire system would be connected to the existing system, and identified a suitable location at the rear of the building to position the hire boiler.

Results

Our customer was very pleased with the hire solution, which enabled work to proceed on refurbishing the existing boiler while the hospital continued to operate and provide a normal service to patients.

Commenting on the project, CRS director Marc White said: "We have recently invested in our boiler hire fleet due to increased demand from contractors and end users, such as hospitals, hotels, courts, and manufacturing plants sites. Our latest ranges have range of boilers operate on a 240v supply, including our 400kw hire boiler."

EQUIPMENT	CRS 100 Boiler, CRS Fuel Tank, Pipe Work, Fittings & Cable
END USER	Kings College Hospital, London
APPLICATION	Heating, LTHW
ADDITIONAL	Single Phase 240v Boiler
